Overview

Product Insights

- European LDPE spot prices decline amid weak demand
- US LDPE spot prices remain stable this week
- Asian LDPE prices remain stable this week
- Latin American LDPE: Brazil prices remain stable, WCSA decline this week

Global Polymer Prices

- The FD NWE LDPE spot prices were down by Eur40/mt and were assessed at Eur1,185/mt
- The FD Germany LDPE contract prices were stable and were measured at Eur1,935/mt
- The FAS Houston spot export LDPE prices were down by \$55/mt and were assessed at \$1,040/mt
- The FAS US East Coast spot export LDPE prices were down by \$55/mt and were assessed at \$1,030/mt
- The domestic contract LDPE prices were stable and were assessed at 78 cents/lb
- The CFR Far East Asia LDPE prices were stable and were assessed at \$995/mt
- The CFR Southeast Asia LDPE prices were stable and were measured at \$1,045/mt
- The CFR South Asian general-purpose LDPE prices were stable at \$1,055/mt
- The Domestic China LDPE prices were stable and were assessed at Yuan 8,705/mt
- CFR WCSA: May 3, spot low-density polyethylene fell \$30/mt to \$1,150/mt
- CFR Brazil: The price of spot LDPE film decreased by \$20 and were assessed at US\$1,170/ mt

LOW DENSITY POLYETHYLENE SPOT PRICES (FEA/SEA/SA)				USD/MT
Assessment	Basis	Lower Price	Higher Price	Price Change
LDPE Film	Domestic China	8710	8740	-50
LDPE Film	CIF Thailand	1070	1100	-10
LDPE Film	CIF South Korea	1120	1150	-10

LDPE GP Film	CFR Brazil	655	685	00
LDPE GP Film	FAS Houston	625	655	00
LDPE GP Film	US Domestic	625	655	00

Note: FAS – Free Alongside Ship (Port of Shipment) CFR (Cost and Freight).

LOW DENSITY POLYETHYLENE PRICE ANALYTICS (MIDDLE EAST): THIS MONTH

Note: FOB (Free on Board); CFR (Cost and Freight).

LOW DENSITY POLYETHYLENE PRICE ANALYTICS (EUROPE & TURKEY): THIS MONTH

Note: FOB (Free on Board); CFR (Cost and Freight).

European LDPE spot prices decline amid weak demand

In the week leading up to May 3, the European market for low-density polyethylene had more downward pressure on spot prices due to poor demand and excess supply. Demand in the European LDPE market remained modest, as end markets including construction and packaging reduced their order intake.

The overall length observed in the market, which was spurred by aggressive imports from Asia and the US, also put downward pressure on pricing. Although European manufacturing remained at decreased rates as a result of competitive import offers, the market's perceived length persisted unabatedly.

Spot activity was modest this week as lacklustre demand kept things in check. The European LDPE spot price was estimated at EUR 1,185/mt FD NWE on May 3, down EUR 20/mt from the previous week.

Upstream, the May ethylene industry contract price in Europe decreased by EUR 10 per metric tonne over the previous month. Participants in the polyethylene market were unsure of the feedstock settlement, therefore there was no response to this decline in the days leading up to May 3. As market

players reported no expectations of favourable adjustments to the dismal supply and demand fundamentals, seller sentiment remained negative.

The Free-delivered NWE LDPE spot prices were down by Eur40/mt and were assessed at Eur1,185/mt during the week of May 3.

The FD Germany LDPE contract prices were stable and were measured at Eur1,935/mt during the week of May 3.

US LDPE spot prices remain stable this week

Low-density polyethylene spot export prices decreased throughout the course of the week ending May 3 as demand for the first few days of the month was quite weak.

On April 28, there was a train car verification of value at 44.5 cents/lb, with signs easing to 42.5 cents/lb by May 2-3. Spot exports were valued at 1,040/mt FAS Houston, a decrease of \$11 for the day and \$55 for the week. The assessment was less than a rail car offer that was heard on May 3 at 42.5 cents/lb.

Market participants will be looking for products at steadily lower values because demand is weak and supply is consistently abundant. Demand for PE is likely down 20% to 30% throughout Latin America compared to this time last year.

A short-term rebound in LDPE demand is not anticipated. Asian markets have seen some activity, but consumers were keeping their stock levels low, and overall activity remained on the light side.

On May 3, April ethylene contracts settled upstream 0.25 cents less expensive for the month at 30.25 cents/lb. Domestic LDPE inventories were constant week over week pending confirmation of completed PE monthly contracts.

The FAS Houston spot export LDPE prices were down by \$55/mt and were assessed at \$1,040/mt during the week of May 3.

The FAS US East Coast spot export LDPE prices were down by \$55/mt and were assessed at \$1,030/mt during the week.

The domestic contract LDPE prices were stable and were assessed at 78 cents/lb during the week of May 3.

Asian LDPE prices remain stable this week

Asian low-density polyethylene prices were unchanged week over week at \$995/mt CFR Far East Asia and \$1,060/mt CFR for South Asia on May 3. This week in Asia, prices remained constant, and customers were observed buying only what they could afford. The futures market in China was operating at a low level as the holiday spirit grew stronger.

China's market trading activities have decreased, some traders are offering profit-free offers, downstream terminals are being more cautious, small orders are buying at low prices to maintain production, and transactions are hard to increase.

Market players in India anticipated the outcome of the anti-dumping duty case involving imports of LDPE. The nation's Supreme Court this week revoked a temporary injunction it issued on April 13 ordering the government to apply a temporary antidumping charge on imports of low-density polyethylene from other nations.

After a complaint was brought by the Chemical and Petrochemical Manufacturers in 2022, the order was granted on March 31, 2017, in accordance with the Directorate General of Trade Remedies' final conclusions. "The non-levy of anti-dumping duty is causing grave irreparable injury and prejudice to the Indian manufacturers on a daily basis," the court stated in its ruling.

The CFR Far East Asia LDPE prices were stable and were assessed at \$995/mt during the week.

The CFR Southeast Asia LDPE prices were stable and were measured at \$1,045/mt.

The CFR South Asian general-purpose LDPE prices were stable at \$1,055/mt during the week.

The Domestic China LDPE prices were stable and were assessed at Yuan 8,705/mt ex-works.

Latin American LDPE: Brazil prices remain stable, WCSA decline this week

On May 3, spot prices for low-density polyethylene in Latin America were lower on the continent's west coast and unchanged in Brazil and the Mercosur area. Prices on the domestic markets in Mexico and Colombia were much lower at the start of May.

CFR WCSA: May 3, spot low-density polyethylene fell \$30/mt to \$1,150/mt CFR for the week, falling short of offers heard of \$1,150/mt to \$1,220/mt and within other price indications of \$1,075-\$1,215/mt.

CFR Brazil: The price of spot LDPE film at US\$1,170/ mt in May, remaining constant from April 26 and below offers received in the \$1,170/ mt to \$1,220/mt range.

COMPLIANCE: Plastic Updates is agreeable with relevant government and state regulations and guidelines including pertinent contest regulations. In giving a market knowledge device to its supporters, Plastic Updates is aware of not uncovering its endorsers or itself to legitimate dangers. The evaluating experts at Plastic Updates follow a severe consistency framework which is dependent upon an inside cycle review and audits. Plastic Updates' procedures, standards, methodology, and policies are regularly reviewed and checked for compliance.

The Plasticupdates.com procedure is impartial and objective. Plastic Updates strives to maintain a competitively healthy and transparent process through independently sourced information in a highly fragmented market while remaining committed to providing relevant information to its subscribers. Plastic Updates.com is only a market knowledge administrations supplier and isn't engaged with genuine exchanges among Purchasers and Suppliers. The market insight that is assembled, grouped and introduced by Plastic Updates is for reference and data purposes as it were. Forecasts given by Plastic Updates are only one of the methods utilized by subscribers to obtain reliable price information.

Plasticupdates.com strives for honesty and integrity in its business practices. In a market that is fragmented, its objective is to reduce information asymmetry. Appropriate legal safeguards are implemented by Plastic Updates to ensure that the information provided by it is not used for the purposes of market manipulation.
